Number 6

WELLING NEWS by Mrs. B. K. Bullock

A ward meeting is to be held Wednesday at 8 o'clock in the church to discuss the erection of a recreation hall. A full representation of the ward membership is expected.

• • • • •

The Misses Hazel and Peggy Bullock, daughters of Mr. and Mrs. A.M. Bullock are home on vacation. They are in training at the Galt Hospital.

• • • • •

Mr. and Mrs. Cal Richardson formerly of Raymond are residing in Welling now. Cal is employed by Mr. Geo Bullock.

Mr. and Mrs. Gerald Gray of Spokane Wash. are expected soon on a visit to friends here and in Raymond.

Leo Bullock lost a parcel of clothing from a car Saturday night. It was returned before the advertisement appeared in this paper. So that proves there are still some honest people.

Born, to Mr. and Mrs. John R. Wolsey, on Tues. June 4th, a boy.

Mr. and Mrs. D.E. Wilde and Mr. and Mrs. Roy Chipman left for Salt Lake City Mon. to attend Juno Conference. They went by car and intend to be away about ten days.

Mr. J. Weinheimer returned Monday from a three weeks trip to B.C.

Mr. and Mrs. Geo Bullock have as guests their daughter Maxine and husband Allan Acroyd, and friend Robert Ingram. Their home is in Long Beach California.

Mr. and Mrs. Spencer Wildo and family of Mountain View were visiting Sun. Mr. Wildo brought his cello and helped out with several numbers at the Sun. night meeting. Their son Ronald is on a mission in the N. Western States Mission.

LEON HARKER HEADS LIONS CLUB

Election of officers for the coming term beginning July 1st this year were held Monday evening in the Sugar Bowl, at the regular bi-monthly meeting of the local club.

Leon Harker, well known school teacher in Raymond for a good number of years, was elected President, with Frank Ball 1st Vice President, Geo Thompson 2nd Vice President, and Velve Heggie 3rd Vice President. Bryant Henninger who has just finished a term as Tail Twister was elected Lion Tamer and Bud Sanford given the office of Tail Twister.

To serve on the Board of Directors Alma Evans and Bush Sabey were elected for a two year term and Geo Ralph to serve a one year term. T.T. Mendenhall was carried over from last year on the Board of Directors.

Some of the projects undertaken by the club the past year, are the Beautification of the Hospital grounds, Fixing up the Ball park and the childrens playground which will be completed this year, a sight conservation program in the public school, sponsoring a Junior baseball club this season, a yearly scholarship at the high school of \$35.00, annual carnival in co-operation with the Athletic Association, the funds from which go into the various projects.

The Raymond Lions have proven themselves a service club, in fact as well as name and due credit is accorded the past President, Karl Wilde and his assisting officers and committees and members for the activities of the past year.

June 13th is the date set for the planting of the lawn at the Municipal Hospital and all Lions are urged to turn out with their rakes.

"Meet me at the Sugar Bowl!"

Raymond Wins Over Warner - - 3-2

In a hard-fought game, featuring outstanding pitching by the hurlers of both teams, Raymond took the top score in the first league game to be played on the home grounds. There was a thrill a minute as the well matched teams battled it out. In spite of the fact that the regular diamond was much too muddy for playing, the game was held at the fair-grounds.

The crowd was not as large as might have been expected, but those present were very enthusiastic.

The manager, Mel Hansen also proved to be very capable in support of the team rights, although most of the time his nose was buried in the rule book.

Batteries for the game were; Warner: Whitney and Bixby; Raymond: Clark and Wheeler.

Here and There

Canada's Radio Monopoly

The citizens of Alberta have been unable to understand why the provincial Government could not operate its own radio station. Twice now the C.B.C. has flatly turned down a request for such a license.

The enemies of the Social Credit Govt. have inferred that such a station would become a propaganda weapon for the party. Her friends have hinted that we could expect nothing more from the present Dominion Government. Neither of these ideas is true but there is grave concern over some of the policies of the C.B.C.

Canada's Radio Act of 1936 steers a course between complete Govt ownership of British and the private ownership of United States radio stations. In Canada the C.B.C. operates stations wherever they please but allow private stations to run under C.B.C. regulations. At any moment the C.B.C. may decide to use the wave length of a private station. The private station must either sell out to the C.B.C. or change to a new wave length which is costly to outfit.

C.B.C.N. in Calgary is threatened with this situation along with C.F.R.B. Toronto, and C.K.Y. Winnipeg.

The opponents of the C.B.C. are asking if this is a fair policy and are demanding a showdown in the House of Commons.

What so angered Alberta and more recently Saskatchewan was that while they were refused the right to operate government stations, Manitoba operates two. Quebec was planning its own government network but was turned down on its request. Little wonder that the charge of monopoly is heard across Canada from both provincial governments and private stations.

These private owners have always resented the enforced carrying of the C.B.C. picked programs over a Dominion hook-up. This means that private stations must take the selection whether they wish to or not.

The C.B.C. will not allow any inter province network except their own. This stifles private enterprise.

Some private stations resent most the system of annual licensing which tends to stifle long range planning.

It is only recently that Canadian radio stations were allowed to broadcast political speeches

WEDDING BELLS Watson-McLean

A wedding of interest took place May 29 in the Cardston Temple when Gerald L. Watson, son of Mrs. F.

Watson, and Mary (Edith) Watson, daughter of Mr. and Mrs. Oliver McLean of Rosemary were united in marriage. Pres. E.J. Wood performing the ceremony. The bride was lovely in long white satin gown and veil and was attended by her sister-in-law Mrs. Logan McLean while Leonard P. Watson supported the groom. Later the young couple motored to Waterton for their honeymoon. They will make their home in Raymond.

Quality Market Changes Hands

Doral Miller, formerly of Magrath and Reed Erickson, formerly of Stirling have purchased the Quality Market. Both boys have filled in the time after coming out of service by teaching school here in town.

The store was owned and operated for the past two years by Tommie Allen and Bill Fairbanks.

Mr. and Mrs. Allen will soon leave for the coast for a well earned holiday, but Tommie says he has no immediate plans for the future.

Bill Fairbanks will assist his brother Paul in the Broadway.

CAN IT BE FIXED

Just at the corner of the Broadway Store is a hole which has been open for a number of weeks. It is the drain which runs along mainstreet. Besides being an eyesore it is dangerous, especially for small, inquisitive children. Perhaps the town could spare a man for half an hour to repair the cover and properly fix it in place.

University Drama Society Visits Raymond

TOP— The Cast BELOW— A Scene from "The Boor"

On Saturday, June 15, the University of Alberta Drama Society, Provincial Players Division, will present three one-act comedies at the Stake House, sponsored by the high school House, sponsored by the high school Student's Union.

Touring central and southern Alberta this spring, the University Players are presenting their program in some forty towns of the province.

The plays, "The Boor," "Meet the Chinook," and "Raise the Devil," are all prizewinners, "The Boor" and "Raise the Devil" having won first prizes at University drama festivals during the past two seasons, and "Meet the Chinook" won Alan Fraser of Calgary the first prize in the 1944 Alberta Folklore Playwriting Project. Be sure to attend these University plays a week from this Saturday, at the Stake House 8.30 p.m. Buy advance tickets from high-school students.

Horvath's shoe shop and the lumber yard of the Raymond Mercantile.

Mr. Landysheff asks that every home in Raymond prepare for the drive and that every available piece of serviceable used clothing be bundled ready for the collection.

"What can you spare that they can wear?"

Dick Kinsey left Wednesday afternoon for a three weeks visit in Los Angeles.

Miss Lois Hawk and her sister Mrs. Eva Moorling are visiting their parents, Mr. and Mrs. E. S. Hawk.

Lions to Sponsor Junior Baseball Team in Raymond

At the regular Monday meeting of the Raymond Lions Club, it was decided the club should sponsor a Junior Ball Team in Raymond.

There are plenty of potential players for a team, and a good one too. Lion President Karl Wilde appointed Albert Winkler as manager of the team with Bill Jones as coach. Bud Sanford is the secretary.

So, you may look forward to an Alberta Junior Baseball Team in Raymond this year.

Local Happenings

Reported by Elsie Mitchell

Ike Roberts motored to Salt Lake City for the conference there this week. Among those accompanying were Mrs. Amy Allen and Mrs. Claude Peterson. Among others attending are Mrs. J. H. Walker, Gladys Holt, Rev. Heggie, Mrs. Wm. Rodeback, Mrs. Doral Stone, Mrs. Minnie Litchfield, Mrs. Godfrey Holmes, Mrs. Geo. Thompson, Mrs. Scott Salmon, Mrs. Fanny Litchfield and Mrs. Lois Heggie.

Dr. and Mrs. F.D. McPherson have moved into the residence formerly owned by Lloyd McPhee. Dr. McPherson is to be a partner with Dr. Harris Walker.

Dean Heggie and family are spending a week visiting friends and relatives in Raymond.

The Misses Lois and Joyce Milner entertained Saturday evening at their home, honoring Miss Bernice Olsen, who has been home for the past three weeks from nurses training school in New Westminster B.C. The evening was spent in games, and a lovely lunch was enjoyed.

Miss Olsen left Sunday evening by plane for Seattle where she will visit relatives for a week before returning to New Westminster.

The Readers Progress Club held their regular monthly meeting at the home of Mrs. Anne Turner. Mrs. Louella Nilsson, president, was in charge. Mrs. Lucille Shaw gave as the book review, The Egg and I. A very enjoyable lunch was served by the hostess assisted by Mrs. Verland Lovett.

The infant daughter of Mr. and Mrs. Raymond Jensen is ill and in the hospital.

The second year beehive girls of the 1st ward motored to Cardston Tuesday, where they did Temple work, afterwards enjoying a picnic lunch.

Many from Raymond attended the funeral of Mrs. Mabel Nilsson Spackman. Mrs. Spackman was a cousin of the Nilsson families here.

Mrs. Chas. Melchior left Monday for Vancouver, where she will meet her daughter and family.

Born to Mr. and Mrs. Jerry Brietweiser, a son. Mrs. Brietweiser was formerly Joan Ford, who lived here some time ago.

Mrs. J.H. Ford and Mr. C.M. Nilsson of Ogden Utah returned Wednesday by plane for their home, after attending the funeral of their brother-in-law, the late Milford Allred.

Mrs. B.F. Johnson and Mrs. Barbary Allen were week-end visitors at the home of Mrs. Juno Allred.

The Birthday Club celebrated the birthday of Mrs. June West at the home of Mrs. Frank Dawley Tuesday when a pleasant social evening was enjoyed playing bingo, the prize going to Mrs. Lucy Stevens.

Mr. and Mrs. I.B. Roberts had as their guests last week Mrs. Roberts brother and wife Mr. and Mrs. D.H. Cameron and Mr. and Mrs. Frank Horrocks all of Uah. Mrs. Cameron, whose hobby is taking pictures, both movie and still life, visited the school where she showed some of her pictures including the life of the monarch butterfly. While here she enjoyed taking pictures of some of the Hutterites and the party motored to Waterton and the Frank slide for more pictures.

Mrs. Emily Rolfsen and daughter Veri motored to Magrath Wednesday afternoon to attend a shower for Miss Margaret Bennett whose marriage to Mr. Varold Rolfsen takes place next week.

Mrs. Geo. Browerton, Mrs. F. M. Hall and Mrs. Hall's two small children arrived from Vancouver Tuesday owing to the serious illness of Mr. T. O. King.

Mrs. Glen Going and small son are visiting in Saskatoon.

Mrs. Ellis Henniger and Mrs. L. L. Palmer have returned home from a ten day trip to Utah where they attended the funeral of the late Edgar Nilsson, former resident of Raymond.

The Ladies Literary Club met at the home of Mrs. Elizabeth Allen when each member brought her mother as a guest. Thirty-five were present. Mrs. Amy J. Allen gave an interesting review of the book, "Behold Your King." Afterward, the mothers were honored, with each member introducing her guest, with prizes going to Mrs. Anne Woolley and Mrs. Christina Palmer as the mothers of the largest families, Mrs. Maria Scoville as the oldest mother and Mrs. Lottie Graham as the youngest grandmother to Mrs. Anne Fairbanks for being the mother who had been in Canada the longest. A dainty lunch was served by Mrs. Allen and Mrs. Irene Redd.

Tuesday afternoon friends sponsored a calling shower for Mrs. Gerald Watson, nee Mary McLean. Many from Magrath and Welling attended and Mrs. Watson received many lovely gifts.

The Children's Neighborhood Club held a farewell party for Beverly and Joyce Hansen, small daughters of M.C. Hansen local elevator agent who has been transferred to Brant Alta.

Jesse Jessop who is now working in Magrath was home for the week-end.

Guy Sabey celebrated his birthday Saturday with a party.

Mrs. L.L. Anderson is a patient in the local hospital.

Jas. S. Anderson was honored last Tuesday evening, when a group met at the Church after choir practice. Mr. Anderson has been a Sunday School teacher for 59 years. Mrs. Amy Allen reviewed the book "Behold Your King" which was afterward presented to Mr. Anderson in appreciation of his work in the Sunday School.

WORLD HAPPENINGS
BRIEFLY TOLD

Soviet scientists are perfecting television sets for examining ships' hulls and objects on the bottom of the sea Moscow radio said.

Special clothing coupons were issued after Jim Morrison when thieves stole his clothes from a car just before he left London on a flight to India.

Returning from fishing in the English Channel, a boat brought back a 50-pound bomb from the sea-bed. A bomb disposal squad dealt with the "catch".

The Japanese Government will collect from three special taxes approximately \$9,000,000,000 yen (\$6,600,000,000), or one-fifth of the country's total wealth.

One of mankind's worst disease pests—the common cold—soon may be shackled by science, Dr. Selman A. Waksman, discoverer of the drug streptomycin, predicts.

The Swiss government has decided to release 10,600 tons of food for distribution to undernourished children in Europe as part of its "save 1,000,000 children" campaign.

Mrs. Mary Crawshaw, 74-year-old flying grandmother, arrived at Bristol, England, after a 6,500-mile trip by air from Edmonton. Mrs. Crawshaw travelled alone to visit relatives in England.

The government of India has announced it will send medical aid and drugs for treatment of ailing Indians in Malaya, particularly Indian laborers who were employed on the Burma-Siam railway.

The new 1,480-foot British-built bridge over the Rhine at Cologne will be named "Patton Bridge" in memory of the late George S. Patton, Jr., and "in fitting recognition of his brilliant dash to the Rhine," the British Military Government said.

Carry Out Tests

Find Germs Often Just Thrive On Dosing Of Drugs

A danger area in which the new drug streptomycin increases rather than decreases deaths from infection was reported by United States Food and Drug Administration researchers.

Penicillin, another war-born drug, may also have this effect, the report added on the basis of preliminary studies.

Carrying out tests on more than 2,000 mice, the scientists found the amount of streptomycin used determined whether the drug killed or cured. Disease-fighting concentrations lie relatively close to those that stimulate disease.

So far, this theory has not been tried out on humans, but Dr. Henry Welch and his co-workers in the division of penicillin control and immunology, declare it is "entirely logical" that "improper dosage . . . may lead to undesirable results."

Results in the treatment of typhoid fever and undulant fever in men and women have been unexplainably erratic: some patients are cured, others show no improvement even after large doses.

Dr. Welch suggests in the Journal of the American Pharmaceutical Association that under certain conditions streptomycin actually increases activity of the germ it is being used to fight. He could not explain this quirk of the drug.

Was Furious

Queen Victoria Was Violently Opposed To Women's Rights Movement

"Queen Victoria Was Furious" was the title given to a short series of feature broadcasts for London's overseas audience. The three programs were about three women who devoted their lives to the cause of women's emancipation, and who worked closely together.

The reason for the title is that women's emancipation had no fiercer opponent than Queen Victoria.

When the movement began to make some headway she declared she was "most anxious to enlist everyone who can speak or write to join in checking this mad, wicked folly of Woman's Rights, with all its attendant horrors, on which her poor, feeble sex is bent, forgetting every sense of womanly feeling and propriety. It is a subject which makes the Queen so furious that she cannot contain herself. Woman would become the most hateful, heartless, and disgusting of human beings were she allowed to un-sex herself; and where would be the protection which man was intended to give the weaker sex?"—BBC Bulletin.

VALUABLE HORSES

Two magnificent thoroughbred Arab horses, gifts of the Emir Abdullah of Trans-Jordan to Princesses Elizabeth and Margaret, have arrived in Liverpool on the transport Orbita. An expert said that in a British blood-stock sale, they would fetch up to \$7,000 (\$31,150).

PLUMBING PREFERRED

Amsterdam University professor envisions a cosmic ray bomb a billion times more powerful than the atomic bomb. "We're beginning to wish more of our scientists had taken up plumbing instead," says the Windsor Star.

AYLWIN, QUE., IS BIRTHPLACE OF STRANGE LITTLE CALF.—Angus Aylwin, the little calf shown above, was born at Aylwin, Que. He had a full-blooded moose for a father, and his mother, Moosie, shown with him, was three parts moose; grandmother, half moose. Ann Just is seen with animals on Freeman Cross' farm.

Health
LEAGUE OF CANADA
presents
TOPICS OF VITAL INTEREST

MEDICAL AID REACHES
NORTHERN OUTPOST

The modern facilities of shortwave radio and a war-built airbase combined recently with the skill of an R.C.A.F. crew to bring modern medical aid to a remote northern outpost in a 'mercy flight', latest organized by the Indian health division of the Department of National Health and Welfare.

It all began when Constable George MacKay of the R.C.M.P. at Fort Chimo, at the foot of Ungava Bay in northern Quebec, radioed that illness in the district required expert treatment.

With the co-operation of the R.C.A.F., a Dakota based at Dartmouth, N.S., was placed at the disposal of Dr. H. W. Lewis, medical director of the East and West Arctic area, who was accompanied by S. J. Bailey, regional director of family allowances for Yukon and the North West Territories, and G. H. Edgecombe of the public health engineering division.

Atmospheric disturbances cut the plane off from radio communication with its home base but the party landed safely after a 1,000-mile flight at an airbase still known by its wartime code name of Crystal One. Transportation to the Fort, eleven miles away, and living accommodation during the party's stay were provided by Martin Brewer, an American engineer in charge of the maintenance crew at Crystal One.

Approximately 40 persons had assembled for a medical examination, three of whom had to be brought out to the Halifax General Hospital for treatment. One, an Indian named Joe Pochene, was threatened with blindness. The other two cases are of a nature which the doctors believe will respond to treatment. The general health of the natives was good, and a good catch of furs assures them of economic security for another year.

In co-operation with Constable MacKay, Mr. Bailey studied ways of fitting family allowance payments into the native economy so as to promote their customary ways of maintaining themselves and to aid them in bad years.

Mr. Edgecombe investigated the buildings and equipment available for possible extension of health services in the area—a problem complicated by a population so scattered that it works out to one Eskimo per 44 square miles. Including the American party at Crystal One, the total white population is less than 40.

When the party was ready to return, it was discovered that one engine of the Dakota had become defective — probably because of the temperature which had dropped to 38 degrees below zero accompanied by biting Arctic winds.

In the meantime, as radio communication had been impossible for nearly a week, a relief plane was dispatched from Dartmouth and touched down at Crystal One just as repairs to the disabled craft were completed.

The pilot for the party on both the trip going north and coming out was Wing Commander W. J. Michalski, officer commanding No. 164 Squadron of the R.C.A.F.

CLOSE BARS IN MEXICO CITY
MEXICO CITY.—The city government ordered the shutdown of pulque bars in the poverty-stricken sections. Housewives had complained that their husbands wasted time and money drinking the potent beverage fermented from maguey root juice. A glass of pulque costs two cents.

Oil seeping from the ground was used by the Indians as salve and medicine.

Ancient Ruins

Many Interesting Discoveries Have Been Made In France

Since 1939, French soil has been so dug up that it would have been surprising if nothing had been uncovered in this old earth.

Thus it was in Lot-et-Garonne and in Var some members of the maquis, surrounded by the enemy and in search of a refuge, suddenly emerged, guns in hand, into prehistoric times, in grottoes with walls painted three thousand years ago with hunting scenes drawn in the stone by the point of a flint.

It was at Valenciennes that the crowd, dashing for shelter, passed in front of the familiar church built in neo-Jesuit style, and after the bombardment was over found among the ruins of the gutted church some old tombs. And then when the excavation began, glossy and historic pottery of the 12th and 13th centuries belonging to old Roman churches was discovered.

In Aix-en-Provence it was not necessary to dig very deep. In 1939, when they were digging the first defence trenches in the Grassi gardens, they discovered not very far from the surface some very promising ruins: mosaics with a white background, green opaline, that marble used in the luxurious baths of the Roman emperors, Ionic capitals, fluted columns, tiles of mouldings; in short, all the remains of what was once a very rich Greek villa and its annexes.

In a suburb north of Aix on the hillside where the Cezanne pavilion is situated, the Germans dug up the ground to build an anti-aircraft station.

The sight chosen for this post was later discovered to be a real mine. There they discovered an ancient Roman town and a Celtic-Ligurian village lying just under the surface. They excavated two busts of warriors with breast-plates, the curious head of a woman with prominent cheekbones, and a stone lintel on which a couple were sculptured. The Roman legions must have pillaged and ruined the buildings, because all the pieces of sculpture were scarred.

—From France-Canada.

Freemen Of London

Reverie Book Of Rules Which Is Masterpiece Of Brevity

On his admission to the freedom of the City of London every freeman is presented with a little red book lettered in gold under the City arms, and entitled, "Rules for the Conduct of Life". There are 36 rules in this little treatise and they are a compendium of shrewd worldly wisdom begotten in experience and the piety and fear of the Lord that were characteristic of our forefathers. No name appears as the author of the book and it has neither introduction nor dedication. It is a masterpiece of brevity.

MUSICAL TOYS

TORONTO.—A former radio engineer for the French underground, Philippe Herzan, may help Canada to replace Germany and Japan as a leading producer of children's toys. Herzan, who escaped from France via Spain two years ago, already operates a small plant here where musical toys are being mass-produced.

North America has more species of game birds than any other continent.

Making Sound Films

The Sound Is Produced From Light Waves On The Film

What makes the sounds you hear in a movie—the music, dialogue, cars honking, factory whistles, and all sorts of miscellaneous noises? A trip to the Sound Department of the National Film Board clarified this process for us. Incidentally, we are told the same process is used in almost every film studio.

First, there is recording the music, which has usually been composed by one of the Board's musicians. The orchestra assembles in front of electric microphones, the conductor facing a screen on which the film is projected. He must watch the film carefully to make sure that music and action are timed exactly. The microphones convert the music into electrical energy, which is transmitted to the recording camera. Here the electrical waves are changed into light waves, and photographed on a spool of film. This spool, known as the sound track negative, is developed and printed just like a snapshot taken with an ordinary camera.

The dialogue, or anything spoken by a commentator, is recorded in the same way—but on a separate sound track negative. Then, of course, there are special sound effects. In the sound library at the National Film Board there are a great many sound effects recorded and ready for use at any time—everything from a bird's song. One film may call for sounds of a crowd cheering, and later on for an explosion. Each different sound is recorded on a separate sound track.

All these different sound tracks, timed exactly to the action of the film, are sent through special sound equipment together. A single sound track emerges—a combination of all the sounds in the right proportions. This final sound track is printed beside the pictures of the film. When run through projectors in the theatres the process which recorded the original sound as light waves is reversed, and from the light waves on the film we get sound.

Origin Of Word

Synonym For Gossip Goes Back To Old Sailing Ships

"Ships" tells that somewhere between the foremast and the main on the old sailing ships stood an oaken barrel. In it was Jack Tar's most precious commodity—fresh water. As a respite from scrubbing, or after a tough hauling on the braces, the sailing man headed for the water butt and its copious scuttle, or dipper. Other mariners usually were there, and the pause that came with the drink made an ideal time to swap news and views. So shipboard gossip came to be known as "scuttlebutt". Gone now is the cask and the armed sailor who stood beside it to see that none of the water was wasted. But the word, as a synonym for gossip or rumor, lives.

REMARKABLE SHEARS

Collier's Magazine says cutting off trees at their base with a new type of giant tree shears is nearly as easy as cutting the stem of a rose with a pair of scissors. Mounted on a special tractor and exerting a pressure up to 60 tons the blades of this instrument can cut down a tree 2½ feet in diameter in 10 seconds.

The Pacific ocean's mean depth is much greater than that of the Atlantic.

New Constitution

Malcolm MacDonald Installed As Governor Of Malayan Union And Singapore

Rt. Hon. Malcolm MacDonald, former British High Commissioner to Canada, was installed as Governor-General of the Malayan Union and Singapore.

The ceremony took place in the same municipal council chamber where Japanese representatives signed surrender terms eight months ago.

The Malay Sultans were not present at the installation ceremony, nor did they send representatives.

Mr. MacDonald is the first Governor-General of the Malayan Union and Singapore. A British White Paper Jan. 22 outlined a new constitution which provides for regrouping of the Malay states and the Straits Settlement into two administrations—a Malayan union and Singapore.

The new constitution has aroused some opposition based broadly on the belief that the Sultans, whose status it is proposed to put into a new relation with Britain, were "hustled" into agreement with the Government.

BIRDS FLEW THE MAIL

TILLSONBURG. — Mailmen on rural routes long have been accustomed to birds making their nests in the mail-boxes. But when the birds start flying out with the mail, that's too much. John Carruthers, mail contractor in this district, was approaching one rural box when a startling flew out with a letter in its beak. He frightened the bird which dropped the letter.

Spanish adventurers found peninsulas growing in South America in the 16th century.

CONDEMNED TRAITOR—Prefect of Lyon during the German occupation and already condemned to death as a traitor, Alexandre Angell faces a second trial before a Paris court after more evidence against him had been unearthed. Angell bears a strong resemblance to Adolf Hitler.

The Egyptian King Rameses II was the first to excavate a canal between the Mediterranean and the Red Sea.

Lethbridge Experimental Station

WEEKLY LETTER

PEAVINE HAY IS A VALUABLE FEED

Until recent years all the farmers in Southern Alberta who grow canning peas have made silage of the vines directly they come from the vinery. This has produced a very satisfactory type of feed for feed-lot finishing of cattle and sheep. However, there is considerable wastage and spoilage when the vines are cured as silage. In recent years mainly because of this large waste, many farmers have expressed keen interest in obtaining information on the feeding value of the peavines when made into hay. These farmers realize that even though more labor is required in putting up the vines as hay than as silage there is less spoilage, the hay is easier to transport and handle, and it does not present the same problems of feeding that silage does, especially during cold weather.

During the past winter, feeding experiments were carried out at the Lethbridge Experimental Station to determine the feeding value of peavine hay as compared to alfalfa hay when fed to fattening lambs and yearling steers. One group of steers and one group of lambs were fed peavine hay and grain, and a similar group of steers and lambs were fed alfalfa hay and grain. The group of steers fed peavine hay made an average daily gain of 1.89 pounds, and the group fed on alfalfa hay made an average daily gain of 1.85 pounds. It took slightly more feed to put a pound of gain on the peavine hay-fed group than on the alfalfa hay-fed group. Both groups of lambs made the same average daily gain, namely 0.30 pounds. Similar to the results obtained with the steers it took slightly more feed to put on a pound of gain when peavine hay was fed than when alfalfa hay was fed. The chemical composition of the peavine hay and alfalfa hay fed in these experiments was determined. It was found that the peavine hay was as rich in protein, calcium, phosphorus, and vitamin A as the alfalfa hay.

Peavine hay has also been compared to alfalfa hay as a feed for fattening steers at the Agricultural Experiment Station in Washington.

In their first experiment the group fed peavine hay and a grain mixture made almost identical gains with the group fed the alfalfa hay and the grain mixture. Both groups required about the same amount of feed to put on a pound of gain. During their second experiment the group fed peavine hay made higher gains and required less feed per pound of gain than the group fed alfalfa hay. At the Agriculture Experiment Station in Wisconsin peavine hay was compared to peavine silage as a feed for fattening lambs, when fed with barley. Both groups of lambs made the same average daily gain. They found that if the silage is worth \$5.50 per ton the hay is worth \$18.55 per ton.

The Agriculture Experiment Station in Washington made studies of the costs involved in putting up the peavines in the form of hay. Using a spreader similar to a manure spreader for spreading the vines, and a side delivery rake and hand labor for putting up the hay, the total cost was \$5.40 per ton of cured hay. This cost included labor at .75 cents per hour, fuel, repairs, depreciation, and interest on the machinery.

It would thus appear, providing labor is available and weather conditions are suitable for hay making, that making hay of the vines is a sound practice.

WITH TORONTO PROM

RONALD DAME popular tenor of opera, concert and radio, was guest soloist at the Toronto Philharmonic Orchestra's Prom Concert, broadcast over the CBC Dominion network, Tuesday, May 28. The young singer made his first appearance on the "Mer" stage years ago as a boy spear carrier. His real debut came in the fall of 1943, when he sang in "Mignon".

JUNE IS CENSUS MONTH IN WESTERN CANADA

EVERY FIVE YEARS the Dominion Government assembles facts about Western Canada — facts which, when they are sorted out, will answer many vitally important questions concerning population, agriculture, housing etc.

To get these facts the Dominion Bureau of Statistics goes to the people themselves. No one else can supply so accurately the information which will guide all governments — Dominion, Provincial and Municipal — in policy-making during the critical years ahead.

This year is Census year, and June is Census month. A new and very important feature will be collection of facts on housing in cities and towns of over 5,000 population.

This 1946 Census is of special interest because it will provide the first reliable picture of Post-War Canada. It is the Reconstruction Census.

IT IS IMPORTANT TO YOU, AND YOU CAN HELP—by answering all questions frankly and correctly when the Official Enumerator calls at your home. There is no reason to withhold information; the enumerator is sworn to secrecy and you can place absolute trust in him. Both he and the Dominion Bureau of Statistics will hold all information in strictest confidence; it can never be used against you by any tax-collecting or other agency or in any court of law.

It is compulsory by law to answer the questions, but, more important, it is good citizenship to reply . . . frankly and accurately.

Must The Consumer Pay?

LABOR MANAGEMENT DISPUTES have reached alarming proportions on this continent during the past year. So far, the situation has been much more serious in the United States than in Canada, but American labor troubles have affected us here, by cutting off the supplies of certain products and raising the prices of others. Strikes have taken place in a number of Canadian industries also, and there appears to be a general move on the part of labor to improve wages and working conditions at this time. Under the democratic system of government in which we believe, no one would deny the right of workers to strike for what they believe to be their rights, but it is an open question if there is a great need in many cases for drastic adjustment of labor management relations.

Trend Viewed With Alarm

The trend toward higher wages in industry cannot be viewed except with some alarm by wage earners and other workers in moderate income groups. They realize that increase in the cost of labor will inevitably cause a rise in prices which will pass from the manufacturer to the wholesaler and then to the retail merchant. In the end, the consumer will pay more for products so affected, and unless the general level of income is raised to meet these increases, considerable hardship will result for a large part of the population. If, on the other hand, incomes are stepped up to meet the rise in price levels, the dreaded spiral of inflation will have commenced and there will be little hope of stopping its ruinous course. During the war, Canada's system of price and wage control and her anti-inflation measures were looked upon as the best that had been worked out for any nation. With the unavoidable loosening of some wartime controls and the rise in labor-management disputes, however, it is now questioned whether it will be possible to avoid a state of inflation much longer.

Very Real And Serious Menace

A serious view of the situation is being taken by consumers, and especially by those in moderate income groups. This includes many farmers who will be adversely affected by increased prices on manufactured goods. In Alberta recently, the matter was discussed at a meeting of representatives of farm organizations where it was made clear that the present threat of inflation is regarded as a real and serious menace. It is said that labor management difficulty is an unavoidable aftermath of war. It must not be forgotten that in Canada labor was solidly behind the war effort, and it should also be remembered that there may exist injustices in regard to wages and working conditions which warrant action on the part of labor organizations. That, however, is only one section of the population, and unless means are found to offset the effect of higher production costs on the prices of consumer goods, we will have either widespread dissatisfaction and hardship, or the disaster of inflation.

A Busy Attache

Washington Star Tells Story About
Visitors To Mexican Embassy

A writer in the Winnipeg Tribune says he is torn between admiration for the speed and imperturbability of the Embassy attache, and sympathy for the frustration which arose in the minds of the callers in the following item from the Washington Star: A short, swarthy man appeared at the main door of the Mexican Embassy here when two Washingtonians called recently for some vacation information. "Sorry," he told them, "you will have to ring at the Embassy office the other side of the building." The two walked around the building and rang at the office door. The same short man answered, not a bit out of breath though he must have dashed madly through the Embassy to get to the other door in time. "Sorry," he told the callers, "the office is closed for the day."

Selective Immigration

Says It Is Important For Canada To
Retain World Position

Fellows of the Royal Society of Canada were told that "selective immigration is imperative" for Canada to retain the world position she has come to occupy and to carry out her obligations under the United Nations Charter. The paper, presented by Prof. H. F. Angus, an economist of the University of British Columbia, stressed that "invitations should not carry offensive implications" and that "quotas should be applied only to doubtful classes."

In the first two years of its life the little blue heron is white.

Royal Society

Want National Museum To Be Put
On A Proper Basis

The Royal Society of Canada urged at a meeting in Toronto that the National Museum at Ottawa be put on a "proper basis" and that the Federal Government appoint a board of trustees to control and develop it. The society also urged that a national library be set up, to assure that copyright books and important periodicals would be available by loan throughout the Dominion.

Twelve Canadians in the field of science were elected as Fellows of the Society. They are: Dr. Helen S. Hogg, of the David Dunlop Observatory, north of Toronto; Dr. L. H. Howlett, associate research physicist of the National Research Council; Dr. C. A. Winkler, of McGill University; Dr. R. Terry, of Ventures Ltd., Toronto; H. C. Horwood of the Ontario Department of Mines; H. M. A. Rice of the Geological Survey of Canada.

All of the new Fellows have distinguished themselves in the field of astronomy, physics, chemistry, geology and biology. Dr. Hogg is the first woman Fellow of the Society's section III. She made outstanding observations on "globular clusters" in the heavens.

Four research Fellowships to a value of \$13,400 were awarded to G. L. Burton, Dr. Herbert Stern of McGill University, Dr. B. S. Rabinovitch, formerly of McGill, and Dr. Marcel Trudel of Laval University. The Fellowships were made possible by grants from the Governments of Ontario, British Columbia, Quebec, New Brunswick, Nova Scotia and Prince Edward Island.

Mr. Burton will study methods of stabilizing farm incomes and Dr. Stern will investigate the physiology of division of the nuclei of the cells of the organisms. Dr. Rabinovitch will carry out an investigation in physical chemistry and Dr. Trudel will study the subject of Canadian-American relations.

POPULATION OF JAPAN

The population of Japan is 73,110,995, a Government census showed, compared with a pre-war population of 72,875,800.

Price Control And Rationing Information

Q.—When will the second lot of canning sugar coupons become valid?
A.—The five extra sugar-preserves coupons which may be used to secure sugar for canning will become valid on July 4.

Q.—Is strawberry and raspberry jam still under the ceiling price regulations?
A.—Yes, all jam remains under the ceiling. Fresh strawberries and raspberries have, however, been removed from the ceiling.

Q.—How many butter coupons become due in the month of June?
A.—Three butter coupons become valid in June—R10 on June 6, R11 on June 13 and R12 on June 20.

Q.—Why are unsweetened solid pack pie peaches in consumer size tins rationed?
A.—Supplies of all unsweetened canned fruits are limited and these types of canned fruits are rationed to ensure a fair and equitable distribution to consumers.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

A Novel Remedy

Whooping Cough Is Cured By A Trip
In A Plane

LEICESTER, England.—Flying a child with whooping cough up to a height of 12,000 feet and then diving steeply towards the ground has proved successful in two cases.

George Derbyshire, Leicester pilot, did it first for the 18-month-old child of a friend. Now he has tried it successfully for his 11-year-old son. The child coughed as the plane gained height, but at 12,000 feet the coughing ceased.

After a steep descent the boy appeared to be cured.

Answer To Last Week's Puzzle

HEALTH STANDARDS

Need Uniform Basic Regulations
Covering Contagious Diseases

The Dominion Council of Health, stressing the need for uniform basic regulations covering control of the communicable diseases throughout Canada, has requested the Dominion Government to prepare standards for regulations which might be applied to all provinces, the Health and Welfare Department announced at Ottawa.

The request was made following the council's 49th annual meeting at Ottawa at which discussion also centred on the lack of uniform provincial legislation to determine responsibility for payment for public assistance or institutional care. The Federal Department also was asked to consider a draft residence bill, prepared by a committee of provincial health officials under the chairmanship of Dr. H. M. Cassidy of Toronto.

The Dominion Council of Health consists of provincial deputy health ministers, representatives of French and English-speaking women and of labor. Dr. G. B. Chisholm, Dominion Deputy Health Minister, is chairman. Sir Wilson Jameson, chief medical officer of the British Health Ministry; Dr. J. B. Grant, of the Rockefeller Foundation, and Dr. W. A. McIntosh, of Toronto, Canadian representative of the Rockefeller Foundation's International Health Division, also attended the meeting.

Appreciation of the "notable contribution" made to public health in Canada by the late Dr. J. J. Heagerty, of Ottawa, was recorded at the meeting.

Empire Building

Britain Without The Empire Might
Have Lost The War

LONDON.—Recalling the dissolution of Germany's European Empire one year ago, the Sunday Express said in an editorial: "Today we watch with perturbation and amazement a movement which, if not halted, may result in swift dissolution of our own Empire."

The editorial said that Britain without the Empire could not have emerged victorious from the war.

"Our strength and the power of our voice in world affairs lies in the fact that we are the steel core of a world-wide Empire and speak of it as its motherland," the Express said.

It added that Britain had taken two "terrifying gambles" by withdrawing her forces from Egypt and by producing a plan to give India complete independence.

"Both decisions have been taken by the socialist party which in past years, has leaned more to international sentimentalism than to Empire building."

The News of the World said the recent statement of the cabinet mission to India on the future of that country "marks the end of a long and by no means inglorious chapter in the almost incredible story of the British Empire." The newspaper added: "It is now up to the political leaders of India to display equal statesmanship and an equal sense of responsibility."

The Sunday Times said: "Grave risks are being run and the stakes are the lives of millions of people who depend on peace and good government in India."

"Wait Oscar — I gotta better idea. Throw in this package of crisp, crunchy Grape-Nuts Flakes — 'n' if THAT comes out you better leave town!"

"Now you're talkin', Joe! The little woman might toss my hat out again but she'll never part with a package of matty-rich, nut-sweet Post's Grape-Nuts Flakes. And while she's fondly caressing 'em, I'll sneak upstairs to bed."

"Sure enough these Grape-Nuts Flakes are wonderful smile bait. And they stick-to-your-ribs, too — with carbohydrates for energy; proteins

for muscle; phosphorus for teeth and bones; iron for the blood; and other food essentials."

"My wife knows that Grape-Nuts Flakes are doubly good because they're made of two grains—wheat and malted barley—cleverly blended, baked and then toasted for matchless flavor, delightful crispness, easy digestion. Those recipes on the package for cookies and other good things will catch her eye, too!"

SMILE AWHILE

Tourist: Any big men born around here?

Native: Nope. Not very progressive 'round here; best we kin do is babies. Different in the city, I s'pose.

Johnny: "I fell in a mud puddle."

Mother: "What, with your new pants on?"

Johnny: "Yes, I fell so fast I didn't have time to take them off."

"What would you do if you married a rich woman?"

"Absolutely nothing."

"Don't you find writing a thankless job?"

"Quite the contrary, everything I write is returned to me with thanks."

George: "But I thought you had forgiven me for that, and promised to forget it."

Ethel: "Yes—but I didn't promise to let you forget I had forgiven it!"

Tourist (in village store): "Waddya got in the shape of automobile tires?"

Clerk: "Funeral wreaths, life preservers, invalid cushions and doughnuts."

Teacher (in junior high school)—"Paraphrase the sentence: 'He was in high dudgeon.'"

"He was in a cell on the top floor."

"You cannot have your puppy in the house," said the harassed housewife. "He will whimper at night."

"But we can turn on the radio," replied the tot, "then nobody will notice the other noise."

The doctor's young son was showing a playmate around his father's office. The lad spied a mounted skeleton and asked where it came from.

"He's had it a long time. I think it's his first patient."

Mrs. Higgs and her neighbor met in the fish queue.

"What's your old man looking so fed-up about, Mrs. Higgs?" asked her neighbor.

"Well you see, he hasn't got a job yet, and he feels it very much that he can't go out on strike like other men."

Pat: Lend me a shovel to get my friend out of the hog.

Farmer: How far has he sunk down?

Pat: Up to his ankles.

Farmer: Can't he get out himself?

Pat: Ah, hut he fell in head first.

EAT FOOD RAW

Raw foods contain the maximum in nutrients and therefore smaller quantities of raw foods satisfy the appetite more quickly than do cooked foods. This is the finding of nutrition experts, and authorities at headquarters of the Department of National Health and Welfare, Ottawa, recommend that raw food should be included on the menu every day.

The solid material remaining of the soya bean after oil is pressed out is used in manufacture of many auto parts.

TAKE IT OFF!—Wailing in protest when made to don a lifebelt, this little erier is one of thousands of refugees returning from Egypt to Dalmatia, who were made to don the belts because of floating mines in the Mediterranean. The youngster was born in UNRRA's refugee camp, El Shatt, in Egypt.

Just Scraping Noise

Is How Famous Violinist's Music
Sounds To His Children

Yehudi Menuhin's playing may be to most people the world's greatest violin music, but to five-year-old Krov and six-year-old Zamir—his son and daughter—it is "just an old scraping noise," it is reported. The youngsters solemnly told a reporter that "Mummy" at her piano plays much better. Both parents say it is wrong to teach music to an unwilling child. "It spoils them for life," said Mrs. Menuhin. "They enjoy music more if it is not forced on them early in life," said the father.

GEMS OF THOUGHT

SALUTARY ADVERSITY

Sweet are the uses of adversity; Which, like the toad, ugly and venomous, Wears yet a precious jewel in his head.—Shakespeare.

Many secrets of religion are not perceived till they be felt, and are not felt but in the day of a great calamity.—Jeremy Taylor.

Sorrow has its reward. It never leaves us where it found us. The furnace separates the gold from the dross that the precious metal may be graven with the image of God.—Mary Baker Eddy.

The sweetest joys a heart can hold Grow up between its crosses.

—Nixon Waterman

The happiest, sweetest, tenderest homes are not those where there has been no sorrow, but those which have been overshadowed with grief, and where Christ's comfort was accepted.—J. R. Miller.

Blessed are they that mourn: for they shall be comforted.—Jesus (Matthew 5:4).

Sometimes grated carrot can be used as a substitute for pineapple in a recipe and the substitution is hardly noticeable.

It's no use wanting a change unless you want to change.

"Meet me at the Sugar Bowl"

NEWS FOR WOMEN

MARGARET AITKEN, newspaper columnist, presents a daily three-minute commentary of news from the woman's point of view over the C.B.C. Trans Canada network, Monday to Friday, at 4.15 p.m. Miss Aitken's series, to run from June 3 to Aug. 30, precedes the regular 4.15 p.m. talk programs arranged especially for Canada's homemakers.

For about a year now the small English town of Norwich has offered a sight worth seeing and the only one of its kind in the world. The City Electrical Engineer, Mr. Sumner has developed a heating process based on entirely new principles and engineers from all over the world have travelled to Norwich to see it. In this process Mr. Sumner uses neither coal nor electricity, but simply conducts the cold water from the river into the building he is heating. Mr. Sumner works on the theory that at compression produces heat, and his heat-pump has proved so successful that he has been able to maintain a temperature of nearly 65 degrees F. in a five story Corporation building. This new British system of compression-heating has the great advantage that working costs amount to one-third of those incurred by electric or solid fuel heating.

Do not waste while others wait, conserve food share with the hungry.

Jas. E. Barker was in Calgary on business the first part of the week.

"Meet me at the Sugar Bowl"

European children who have survived the horror of invasion and the squalor of life under enemy occupation are clad in rags. These pathetic victims of War's aftermath are in desperate need of clothing. To relieve their misery an urgent appeal is made to every Canadian family, to ransom their attics, wardrobes, and trunks and contribute every serviceable garment that they can spare to the National Clothing Collection. Local depots will be announced shortly.

WHAT FRAGRANCE when breakfast includes Maxwell House! This glorious coffee is extra delicious because it's **Radiant-Roasted** to develop the full goodness of the superb Maxwell House blend.

By Dr. F. J. GREANEY, Director, Line Elevators Farm Service, Winnipeg, Manitoba

Evil Winds Do Blow

Soil drifting has been serious in the drier parts of the Prairie Provinces this spring. It should be recognized as evidence of the ever-present and growing menace of soil erosion.

Confronted as we are with a world-wide demand for maximum food production, the experiences of this spring strongly emphasize our responsibility in getting at the roots of the soil erosion problem in Western Canada. This year, prairie farmers should remember the old proverb, "Coming events cast their shadows before," and be prepared to meet the challenge. Evil winds have blown, and, as we know, they will blow again.

Soil drifting occurs chiefly on summerfallow. According to recent estimates there will be some 15,000,000 acres of summerfallow in the three prairie provinces this summer. Unfortunately, moisture conditions are below normal in most districts. This means, of course, that the potential source of danger is both extensive and real. During the coming season summerfallow practices must be planned to control soil drifting.

Two basic methods are commonly used to prevent soil erosion by wind. The first of these includes such practices as the roughening of the soil surface, and the forming of a good trash cover by surface cultivation or ploughless fallow. The second method is to increase the size of the soil aggregates by various cropping and tillage practices. Such favourable soil conditions, however, can only be obtained by the timely and careful use of the proper cultivating implements. This year, farmers would be well advised to discuss all summerfallow operations with their local Agricultural Representative or Field Supervisor.

Canadian Pacific
WORLD'S GREAT

RETURNED TO C.P.R.: First Canadian Pacific passenger liner to be released from war and repatriation service the 20,022-ton Duchess of Richmond has been returned to her owners by the British Ministry of Transport. Upon completion of the reconditioning and modernization necessary after two years as a troop carrier she will resume her peacetime run for Canadian Pacific Steamships between Liverpool and Montreal or Saint John, N.B. The Duchess of Richmond last docked in Canada at Quebec City in August of 1915, landing 4,000 Canadian repats including the two touching Canadian soil, (inset). From January of 1911 until her last voyage on the Liverpool-to-Bombay repat run she

carried 170,000 passengers and steamed 437,189 miles in the war service from which she is now honorably discharged. Still in that service are the Duchess of Bedford, Empress of Scotland and Empress of Australia, of the ocean fleet, and the Princess Kathleen of the British Columbia Coast Steamship Service, owned and operated by the Canadian Pacific Railway. Of the 22 ships Canadian Pacific turned over to the Admiralty from its two-ocean C.P.S.S. fleet, its B.C. coastal service and the Canadian Australasian Line, in which it is a partner, 12 were sunk, two lost and two taken over permanently by the Admiralty.

OUR COMPLETE SHORT STORY—

VERY DEAR

By BILLIE LONGWELL

Copyright
Whetler Newspaper Syndicate

THE girl, sitting in the cocktail lounge, was conscious of someone leaning over her table. She stopped searching for matches in her pocketbook and looked up.

He stood there tall and straight wearing a first lieutenant's uniform. His face was grave but pleasant. He said, "Everybody in this place is talking to someone. May I talk to you?"

She didn't answer immediately. Her eyes closed to narrow slits. A flush crept over her face. Nervously, she brushed her hair back from her forehead when she finally said, "I guess so," he already was seated.

He suggested another drink. She nodded assent. He said, "My name is Peter and I am going to kidnap you."

At that she laughed. "My name is Julie and I'm making a train in exactly half an hour."

"Hm, Julie! I always liked that name. You are going home?"

"No, I live here."

"But your accent is southern."

"My parents live in the south. That is where I'm going."

"That is where you were going," he said with a grin. "Remember, I'm going to kidnap you."

She glanced at the clock, raised her glass in a silent toast. "I must hurry."

"Oh no, Julie. You have some questions to answer," said Peter Granville. "Are you married to a northern?" she nodded negatively. "Engaged?"

"No."

"Good, you are practically kidnapped," said Peter with enthusiasm. Intercepting her second glance at the clock, he asked, "You wouldn't run away from a soldier whose leave ends at midnight tomorrow, would you?"

She abruptly set down her glass and looked at his five battle stars and purple heart medal. "No," she said in a low voice, "I wouldn't run away. Where do you want to go from here, lieutenant?"

He reminded her that his name was Peter. And he mentioned a spot on the east side which used to serve the best steaks in the world and was frequented by "newspaper people."

"That is the place for us," she said, "if it is what you want."

Walking from the lounge, he put

his arm through hers and held her hand.

"Peter," who asked suddenly, "are you married?"

"No, though I was once. But she couldn't bear me."

She pressed his hand. "She must have been crazy."

"No," Peter disagreed, "she was very sweet fundamentally. A little too young and perhaps a little spoiled. Also, I was eight years younger than I am now and a newspaper reporter slightly on the screwy side. I blamed her terribly at first. But, later on, learned better. She didn't know the score and I didn't make much of an effort to straighten her out. She hadn't been around much and she believed we were all squirrels."

"I see," she murmured. They got into a cab. "You make a great many excuses for her."

He gave her a level look. "She was very dear to me. How dear I didn't realize at the time."

Changing the subject, he asked why she had come to New York.

"There were many reasons," she said softly, "but mainly I wanted to change myself."

"Change yourself?"

"Yes," she continued gravely. "Once a man I was very fond of accused me of being a self-centered little snob who didn't do much more than show horses, dance, and get into tantrums." She laughed self-consciously. "Eventually, I understood he was right so I tried to do something about it."

"And did you succeed, Julie?"

"I believe so. At any rate, I have made friends in and out of the store where I have been working. And, so far, I haven't been fired for getting into tantrums."

"We're here, bud," the caddy interrupted.

"Julie," he said then stopped, after he paid off the car.

"Julie," he repeated, removing his overseas cap, "steak suddenly doesn't appeal to me. It now is almost midnight and I only have until this time tomorrow. Will you think I am an awful wolf if I ask you to come with me to the borrowed apartment I am staying in and answer some of the hundreds of questions I want to ask you?"

"No Peter," she answered, without hesitation. "I won't think you are a wolf."

"Good girl," he declared, jauntily restoring his cap and waving for a cab. She watched him and smiled. They rode in silence to the apartment but once inside Granville he held her close.

"You know Julie," he said, "you are making my last hours here perfect."

"Sit down, Peter," she said drawing him toward the davenport. "You told me about your ex-wife. Now I'd like to tell you about my ex-husband." She gazed straight ahead and spoke in quiet, unemotional voice. "Finally I realized my own faults, too. I was selfish and possessive. I resented his pals; they seemed to have more in common with him than I did, and though he was very dear to me, we crashed."

"But," she turned to the silent man, "even now, four years later, I still remember the way he cocked his hat, the way he suddenly burst into songs—even the way he always left the top off the toothpaste which never failed to annoy me. And I insisted on calling him by his first name, Cornelius, which he detested. I thought it dignified." She smiled wistfully, reaching for a cigarette. "Silly, wasn't it? We really did have our moments, like wonderful days by the sea."

Taking the cigarette from her fingers, he pulled her into his arms and kissed her.

"Young and inexperienced, Julie, I would say." He put his hand under her chin. You are very dear to me, Julie, and I want you very much. Am I going to have you?"

"Oh, Pete," she answered. "I'm all yours. Furthermore, I promise not to get annoyed if you leave the top off the toothpaste." She moved closer. "Whatever made me like the name Cornelius?"

He held out his dog tag for her to read: Cornelius Peter Granville.

"It looks, darling," he laughed, "that when the marriage bureau opens tomorrow you'll get that dignified name again."

"Oh, no," she exclaimed. "I've really changed, darling, and this time we are not going to crash. I'll just be the wife of Pete Granville, newspaper reporter, now on leave to the Army."

World Famine

Scientists Say That Mice, Bugs And Other Pests Destroy Huge Quantities Of Grain

World famine? Scientists say there is more than enough grain in the world to feed all hungry people—except for mice, bugs and other pests.

The scientists reported to the United Nations Food and Agriculture Organization that rodents, insects, mice and fungi moulds destroy, after harvest, one-tenth of the 725,000,000 tons of cereals, peas, beans and oil seeds produced each year.

Thus this year's estimated loss of 72,500,000 tons is more than seven times the 10,000,000 tons of wheat the world will be short this year. Rodents alone will eat 25,000,000 tons and insects will destroy 36,250,000 tons, the scientists said.

Sweet and cool in any Pipe

Is Ambitious

Wren Marjorie Sharp Intends To Be An Architect

Wren Marjorie Sharp wants to take a course in architectural drafting when she gets her discharge but Navy officials in Regina were a little doubtful about the idea at first.

They thought stenography or hairdressing would be a more suitable profession for a woman than architectural drafting. Besides they had never heard of a female architect. "Wasn't that more of a man's profession," they suggested. They hadn't heard of Barbara Humphrys, VLA architect at head office, and other topnotch women architects.

Wren Sharp said she didn't think so and suggested that they call Miss Blanche Lemoie at the city planning office. "She might know about that," said Wren Sharp. "She's a female architect."

Miss Lemoie was contacted by the Navy men and she convinced them, although it was supposed to be a man's world, female architects were not as unusual as the Navy might suppose.

Wren Sharp will get her course in architectural drafting and she may be able to take it in Regina. A course in this subject is opening at the Canadian Vocational School there.

Why does she want to take up architectural drafting for a career? "I don't like typing or bookkeeping or anything of that sort," Wren Sharp explained. "But I do like drawing."

Mathematics and drawing were her strong subjects when she attended Scott Collegiate. The family at 2920 Regina avenue, including one brother and five sisters, consider Wren Sharp's choice of a career unorthodox, but they're getting used to the idea.

A NATURAL TRAP

There is an albatross trap of natural formation in Australia. The birds dip between the walls of a steep-sided valley and, because of the lack of wind, lose altitude so rapidly that they crash against a cliff at the end of the enclosure.

The burrowing owl is the only land bird which nests underground.

USING YOUR EYES TOO MUCH?

Modern life makes big demands upon the eyes; but two drops of Murine will cleanse, soothe and refresh them when they are tired or irritated. Eyes are strained—two to a lifetime—so take good care of them. There are seven important ingredients in Murine: let this safe, dependable lotion help your hard-working eyes; use Murine every day.

RUSSIAN ROYALTY IN WEDDING RITES—In typical royal style Countess Elizabeth Lamsdorff and Prince Andrew Shirsinsky-Shchemotoff are married at the Russian Orthodox Church of Christ the Saviour in New York City. The Rev. Vasil Kurduimoff conducts the wedding ceremony as two attendants hold symbolic crowns over heads of the Russian royal pair.

UNDEFENDED BORDER

Length Of Canadian-American Line Is Really 5,655 Miles

OTTAWA.—That undefended Canadian-American border, long the toast and the salvation of after-dinner speakers, is 5,655—not the customary incorrect 3,000—miles long, Health Minister Clinxton insisted here.

"And," he added in an address before a joint meeting of the Kiwanis Clubs of Ogdensburg, N.Y., and Otton, "every inch of it is undefended."

"In Rock Island, Vermont, while sitting in the barber's chair you can get your hair cut in Canada and your shoes shined in the United States. Not far from there, if you are driving along the highway from east to west you are in Canada, but from west to east you are in the United States."

"During a by-election in Quebec two election workers were moving from town to town forcefully canvassing votes for the man they supported. Down somewhere about the border they met a farmer who didn't respond much to their pressure. At last they gave him the punch-line: 'Remember,' they said, 'on Monday your man's Davidson.' 'Well,' he replied, 'I don't know about Davidson. May seem strange for a man from Vermont, but my man's Roosevelt.'"

"The Tax Assessors Office had to decide on which side of the United States-Canada border an old lady's newly purchased firm lay. Surveyors finally decided it was just inside the United States border."

"The old lady smiled in relief. 'I'm so glad to know that,' she said. 'I've heard that winters in Canada are terribly severe.'"

VISITING BRITAIN—The 11-year-old King Feisal of Iraq is intending to spend four months in Britain. He will be accompanied by the Queen Mother and other members of the royal family. While in Britain the boy king will continue his studies.

For Extra Help

Farmers Who Serve Twelve Meals Can Obtain Ration Books

Farmers who find it necessary to serve twelve meals or more to their temporary hired help may apply to the wartime prices and trade board for what are called transient labor rations.

Where the person hired by the farmer for extra work stays longer than two weeks, the farmer is authorized to make use of his employee's ration book. In this way the employee is considered a member of the household, and the farmer may use his meat, sugar-preserves and butter coupons as they become valid.

German Bombs

Nearly Ten Tons Lie Beneath The Rubble Of Greater London

Nearly 10 tons of high explosive in 21 unexploded German bombs still lie beneath the rubble of Greater London's bomb-razed sites. Capt. G. A. Frake of the Royal Engineers' No. 2 Bomb Disposal Company—famed for detonating Stan, a 1,000-pounder at Croydon several months ago—said that seven of the bombs are being dealt with while two discovered recently had been abandoned because they were not a public danger.

HIS "KNOW-HOW" MAKES YOUR TIRES LAST

HE FINDS and fixes tire troubles before they start. He has the know-how and equipment that adds hundreds of miles to the life of your tires. You have everything to gain by placing all your tire problems in the willing, skillful hands of your nearby Firestone Dealer.

He's a good neighbor. His standards are high and he'll be glad if you drive in regularly for a free tire check-up. He will keep air pressure right. He will correct little troubles before they become big.

And when you need new tires he will proudly and confidently recommend the only synthetics proved on the speedway for your safety on the highway—Firestone—Canada's No. 1 Tire.

New Industry

Alberta To Launch \$100 Million Industry In Wood Products

A large new industry for Alberta involving timber purchases of almost \$100,000,000 and manufacture of wood products to be distributed on a continent-wide basis, is likely to be launched soon, the Edmonton Bulletin said it was learned.

Informed sources said the Dominion and provincial governments and large Canadian financial interests were behind the project which will involve purchase of timber over a wide area of the north country from High Prairie, Alta., to Dawson Creek, B.C., and north to the town of Peace River.

It was indicated plans for erection of a huge plant for preliminary processing and prefabrication which was likely to be built in the Peace River area at a point where adequate rail facilities would be available.

This source said it was understood the wood products to be manufactured would be made by a new process developed as a result of recent scientific research. Articles such as household furniture and prefabricated buildings would be turned out.

The project in its entirety would employ thousands of persons.

This Atomic Age

It Is Improbable That Man Could Destroy The World

"Although man thinks he has altered the earth considerably, is inclined to believe he owns it and, in this atomic age, may even boast he can destroy it, his million years of recent past is but a flash in the pan to what preceded him, said Dr. E. S. Moore in his presidential address to the Royal Society of Canada, meeting in Toronto.

Dr. Moore spoke of rock formations found in Eastern Ontario and Southern Quebec indicating life of some kind, probably plant life, existed approximately 1,800,000,000 years ago.

As to the possibility of man destroying the planet, Dr. Moore said geologists and physicists agree it is "most improbable" that one terrible atomic blast could blow up the earth. There is so little fissionable material, such as uranium and thorium, scattered through the mass of inert material that makes up the earth that any explosion would not be propagated, resulting in a purely local effect, he explicated.

"Specially" Sweet

RECIPES

EGGS A LA MODE

Translate that little phrase "a la mode" literally, and it means "in fashion". Right now, eggs—almost any way you like them are "a la mode", and there's an abundance of them on the market.

Eggs are a fine source of protein and contain essential vitamins and minerals. But those are things to keep quietly in the back of your mind. Just serve a dish as tasty and delicious as Baked Cheese Eggs, and there'll be no need for urging on your part to get anyone to finish and ask for more.

Baked Cheese Eggs

6 eggs
2 tablespoons sharp cheese spread
2 tablespoons salad dressing
2 tablespoons finely chopped green pepper
2 tablespoons finely chopped celery
1/4 teaspoon salt
Pinch of pepper
1 cup corn flakes
1/2 teaspoon melted butter

Cook eggs in water just below boiling point about 20 minutes. Cover with cold water; remove shells. Cut eggs in halves lengthwise and remove yolks. Mash yolks and combine with cheese, salad dressing, green pepper, celery and seasonings. Refill egg whites, rounding up filling. Place in well-greased shallow baking dish. Crush corn flakes into fine crumbs and mix with butter. Sprinkle buttered crumbs over eggs. Bake in moderate oven (375 deg. F.) about 15 minutes.

Yield: 4-6 servings (12 halves).

CANADIAN TOYS

TORONTO.—A former radio engineer for the French underground, Philippe Herzan, may help Canada to replace Germany and Japan as a leading producer of children's toys. Herzan, who escaped from France via Spain two years ago, already operates a small plant here where musical toys are being mass-produced.

To Feel Right — Eat Right!

By ANNE ADAMS
Perfectly precious for Easter and all special occasions! This so dainty dress, Pattern 4677, has its very own jacket. Also, it can easily be made as a sweet smock!
Pattern 4677 comes in sizes 2, 4, 6, 8, 10. Size 6 frock takes 1 1/2 yards 35-inch fabric.
Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

London has approximately 7,000 telephone operators. 2675

In Memory of W.D. Albright

by R. J. Deachman

It was in September 1901, almost 45 years ago. Around a table, in the reading room of the Ontario Agricultural College sat half a dozen Freshmen of the class of '05, discussing the future, wondering what would happen when four years later they graduated and took the world in tow. Some were going back to the farm. Others would seek professional employment. The late W.D. Albright was in the group. I recall his words: "I have", said he, "great faith in the possibilities of practical agriculture." He lived and died in the effort to make that faith bear fruit. It was his contribution to life in the land he loved so well.

As a student he was exceptionally keen. He wanted to know the why of things. His life was a constant search for better ways. The course at the Ontario Agricultural College runs four years, the Associate course, two years. He finished his two years and, at the age of 21 became Editor of the "Maritime Farmer". The east was a fresh field to him, he met its challenge with enthusiasm and left his imprint there.

During my own college life I had done some work for "The Farmers Advocate", mainly reporting conventions, writing gossip from the O.O.C. One day I was in London and called on John Weld, then manager of that publication. He asked me if I could name a man who might become associate editor, my reply was "W.D. Albright". Now it happened that Albright in his second year had written a sharp criticism of the course at the O.A.C. coupled with suggestions for improvement. I have no idea of the wisdom of the criticism, he was only 21 at the time. I mentioned it to him years later and he shrugged his shoulders, laughed and said: "Oh yes, I knew much more than that I now." It must have been a good letter. Mr. Weld remembered it and said: "Isn't

THE SPANISH TOUCH

ALYS ROBI, French and Spanish speaking songstress on Latin American Serenade, is expected to put her Spanish to fluent use with the arrival of Chileo Valle, Cuba singer now co-starting with Alys Robi. The two latin experts sing with Don Miguel and his orchestra over the CBC Dominion network, Sundays at 9:30.

he too young, too bumptious for this job?"

There are odd moments in life when a flash from the past serves the purpose of the present. I recalled a Scotch aphorism which I heard first from an uncle of mine, read it years later in a speech by Ramsay MacDonald. "If you would have teams to drive you must have coals to break", I said. Albright became Associate Editor of "The Farmer's Advocate", enriched his life by a new experience, broadened his judgement, and more than satisfied the management of that publication.

In 1913 he moved to the Peace River country. He had never been in the West before, yet he knew it better than most westerners. He had been a student of climatology. He had recorded productions in different areas. He decided to go to the Peace River Country. It thrilled him from the first day he saw it. In latter years he referred to it as the 'friendly north'. In time his farm became a Government Experimental station. Through all these years he worked for the im-

provement of agriculture, every phase of it. He wanted better homes, better methods, a sounder economic basis for progress. He carried his gospel to the east, told the story of the west. I wish he might have lived longer to see the harvest of his effort. His was a far-ranging mind, seeking always an ever receding goal. That is the lesson of his life, the message he left behind him: Onward, always onward for the human mind there is on earth no terminal station, no ultimate goal.

ATOM BOMB DEFENSE

R.A.F. Expert offers Hope After Year of Unsettled Peace.

"The only military defense now possible is before the shooting starts," said Group Captain Andrew Combe, R.A.F., 7 year holder of the worlds long distance flight record, in a recent interview.

The Only Remedy for Hunger is

FOOD!

The most efficient way in which we can send increased bulk shipments of WHEAT, MEAT, CHEESE and EGGS to needy countries is through the Canadian government food Boards. These increased bulk shipments can only be made providing we reduce our own consumption. Here are five important ways by which we can make greater quantities of food available for export:

- (1) BUY AND USE LESS BREAD, FLOUR AND OTHER WHEAT PRODUCTS, MEAT, CHEESE AND EGGS, SUBSTITUTE VEGETABLES, FRUIT AND FISH WHERE POSSIBLE.
- (2) KEEP YOUR HOME STOCKS LOW - BUY ONLY ENOUGH FOR IMMEDIATE REQUIREMENTS.
- (3) AVOID ALL WASTE.
- (4) GROW A VICTORY GARDEN AGAIN THIS YEAR. PLANT MORE THIS TIME IF YOU CAN.
- (5) DONATE ANY MEAT COUPONS YOU CAN SPARE. ENQUIRE AT YOUR LOCAL RATION BOARD.

Share with the hungry!

FROMM'S JEWELRY

IT MEANS A LOT when the meal includes Maxwell House. This marvellous coffee is extra delicious because it contains choice Latin-American coffees... the finest the world produces.

On an average of at least once a week a truck has dropped in a mud-hole in front of Hervey's blacksmith shop. The amount of time and energy expended in getting the vehicles out could have dropped several loads of gravel into it.

Military Aspects Of The Recent Muskox Trip

OTTAWA. — Deliberate emphasis of civilian over military aspects of the recent Operation Muskox has been given by defence officials here but there has been no lack of confirmation for the Arctic expedition's chief finding—that large-scale invading forces could deploy through the snowy tundra of that vast undefended area.

One authority asked to comment specifically on the military results of the 3,500-mile trek from Churchill, Man., through the Arctic Circle to Edmonton, frankly said he thought the exercise had been "embarrassed by too much publicity."

He declared the military aspect of the expedition had been given almost a sinister twist while the interest of American observers by "irresponsible" speculation had made it appear that the United States was going to move in to assume a defensive role that was the sovereign responsibility of Canada.

He referred to criticism of the intent of the exercises which has appeared in the Russian press and thought it might have resulted from over-emphasis of American and British participation.

In the first place, he said, Canada would not entertain criticism from any quarter for military investigations carried out within her own borders and in the second place Russian military attaches had an equal opportunity with British and United States officials to apply for a sent in one of the snowmobiles. In fact, Russian military men had gone to Churchill to study the expedition's program and watch its start.

There have been preliminary reports on the results of Muskox expedition, but the final report embodying various phases of the exercise will not be released until August. This report, which may be disclosed in part through a press release, will touch on various subjects ranging from discipline to mechanical developments.

No further exercises, an official said, were planned for "some little time."

Already, he said, the experts had reported on the mechanical troubles which had developed en route and suggestions had been blue-printed which would remove these problems in army vehicles used in subsequent Arctic manoeuvres. Suggestions for winter clothing improvements have also been embodied in practical plans already carried out.

CHEQUES ON WAY

Over Six Million Dollars Is Going To Barley Producers

OTTAWA. — Payments totalling \$6,106,932.94 are now being made to all producers who delivered barley either through country elevators or by farm-to-farm transactions in the crop year 1944-45. Trade Minister J. A. MacKinnon announced in the house here.

The payment covers deliveries made between August 1, 1944 and July 31, 1945, inclusive.

Approximately 155,000 cheques are involved covering total deliveries of 80,435,781 bushels and the amount per bushel of the payment is 7.59 cents, Mr. MacKinnon said.

The amount involved in the payments is the difference between the advance equalization payment and the equalization fees collected in respect of barley exported, after allowing for administration costs and estimated cost of making the payment.

In the case of deliveries through country elevators the cheques are compiled through information submitted to the wheat board by the handling companies.

Where producers made deliveries to more than one elevator separate cheques will be issued, one for each of the companies to whom deliveries were made. The cheques will be forwarded to the elevator companies for distribution when completed, but cheques covering the farm-to-farm transactions will be distributed by mail from the offices of the board.

ELECTRICALLY RUN

British Company Perfecting Car To Run 50 Miles Per Hour

LONDON. — An electrically-run automobile capable of 50 miles an hour is being perfected by a leading British motor manufacturing company working with an electrical engineering firm, The Daily Telegraph reported. The usual drawback to electric cars—their great weight caused by lead plates in storage batteries—has been overcome by using plates made of magnesium a very light metal.

LOOT RECOVERED

BERLIN. — Ancient gold coins valued by experts at £1,250,000 (\$5,342,500) said to have been looted by Hitler from Austrian monasteries to finance the last stand which he planned to make in the Bavarian "redoubt", have been recovered by United States army intelligence agents at Salzburg, Austria.

HIS SUBJECTS THREATENED BY CIVIL WAR—Civil war is threatening the 15,000,000 subjects of Mohammed Riza Shah Pahlavi, King of Iran, as the Azerbaijan delegation and government break negotiations.

YOUTHFUL DUKE OF KENT MAY SIT ON THRONE OF GREECE—Throne of Greece may be offered to 10-year-old British Duke of Kent, according to an Athens report. Son of the late Duke of Kent, killed in a plane crash during the war, and Princess Marina of Greece, he is shown, right, with mother, brother and sister.

LECTURE ON ARCTIC EXPEDITION—Col. J. T. Wilson, who, as Director of Operational Research at N.D.H.Q., Ottawa, was largely responsible for the organization of "Exercise Musk-ox", is presented to Their Excellencies the Governor-General and the Viscountess Alexander prior to his lecture on this 3,100-mile Arctic expedition, delivered under the auspices of The Canadian Geographical Society at the National Museum of Canada, Ottawa. His Excellency, who is Honorary Patron of the Society, displayed keen interest in the lecture, which was illustrated by official motion pictures and lantern slides specially released for this occasion. Left to right are: Their Excellencies, with the Governor-General's aide-de-camp; C. G. Cowan, President of The Canadian Geographical Society, and Colonel Wilson, Director and Fellow of the Society.

Problems Of Distribution Of Consumer Goods

OTTAWA. — Representatives of Canadian industrial organizations and government agencies engaged during the war in regulating distribution of consumer goods, decided to send a delegation to the Boston conference on distribution in October as a first step in a combined attack on distribution problems in Canada.

Daniel Bloomfield, director of the Boston conference, and Dr. Raymond W. Miller, advisory counsel, explained the objects of the conference in co-ordinating the best minds in industry to improving distribution facilities and reducing costs.

Industry had made tremendous advances before and during the war in solving production problems. Mr. Bloomfield said, but had lagged behind in ironing out shortcomings in getting the goods from the producer to the consumer. He was anxious that Canada should set up a conference similar to that held annually in Boston so the two conferences could co-ordinate their efforts and later join similar meetings in London and other countries.

CHILDREN ENTERTAINED

LONDON. — Children from poor homes in the east end mingled with the sons and daughters of ambassadors at the Mansion House when 1,400 children were entertained at the first lord mayor's children's party since the war.

TO SAVE WHEAT

WASHINGTON. — The agriculture department announced that bakers throughout the United States are required to reduce the weight of their bread and rolls 10 per cent.

WELL-KNOWN FINANCIER DIES

Morris W. Wilson, 63, president and managing-director of the Royal Bank of Canada and one of the Dominion's most prominent financiers, died in hospital in Montreal after a short illness. Born at Lunenburg, N.S., Mr. Wilson was chancellor of McGill university and held a large number of directorships and other positions of public responsibility in leading Canadian groups. Educated at Lunenburg, where he entered the services of the Royal Bank in 1897, Mr. Wilson later served in Halifax, Charlottetown, Montreal, Truro, N.S., and Vancouver. In Montreal, he was appointed general manager in 1929, vice-president in 1931, and to the position he held at his death in 1934.

Are Unable To Agree On Air Commerce Plan

MONTREAL. — Canada's hopes for immediate efforts to agree on a multilateral convention for a common code of international air commerce regulations fell before stubborn and well-supported American determination to delay action for another year.

Commission three of the Provisional International Civil Aviation Organization's first general assembly unanimously adopted the American delegation's resolution postponing any attempt to complete a multilateral agreement at the present assembly.

H. J. Symington, spokesman for the Canadian delegation, in order to save time and hasten the full discussion that is to be given multilateralism at this meeting, finally agreed to make acceptance of the American proposals unanimous.

Dr. D. Goedhuis, Netherlands delegate, also fought a losing battle to retain before the commission the possible hope for completion of a convention at this meeting.

William A. Burden, assistant secretary of commerce for air and leader of the American delegation, succeeded in obtaining adoption without dissent of his resolution which urged an exhaustive discussion now of the principle of a multilateral convention but assumed at the outset that none would be signed at the present assembly.

Dr. Goedhuis moved an amendment which would remove the American resolution's assumption that a convention would not be adopted at this assembly.

NEW EXPERIMENT

Lobster Industry Is To Be Given Trial In B.C.

VICTORIA. — Co-operating with the Dominion government the provincial government has set aside 95 acres of foreshore in a lagoon near Nanaimo for experimentation on whether a lobster industry can be established on the British Columbia coast.

A previous experiment had been attempted at Sooke about 20 years ago, said George J. Alexander, deputy commissioner of fisheries for B.C.

So long as the lobsters, brought here from the Atlantic coast, remain in captivity they thrived but when released they disappeared.

"There has been a feeling that possibly that experiment was not given the fullest scope," said Mr. Alexander. "Nor was time given to study their breeding habits. It may be not enough lobsters were planted to overcome their natural enemies. The new experiment will be on a larger scale."

TRIAL IS DELAYED

TOKYO. — Lawyers who will defend former premier Hideki Tojo and 25 other major Japanese war crimes suspects have asked for more time to prepare their cases. The defence counsel filed the motion for delay of the major war crimes trial past its scheduled starting date of June 3.

COMPANIES HAVE PAID

OTTAWA. — Companies which operated elementary flying training schools during the war have turned over to the government a total of \$6,091,035, it was reported in information tabled in the commons for John Diefenbaker (PC - Lake Centre).

Changes To Be Made In Policy On Immigration

OTTAWA. — Immigration doors to the Dominion were opened a little wider when Hon. J. A. Glen, minister of mines and resources, informed the house of changes in Canada's immigration policy.

The following will now be on the Canadian immigration list and admissible to the Dominion:

"The father or mother; unmarried son or daughter, 18 years or over; the unmarried brother or sister; the orphan nephew or niece under 16 years, of any person legally admitted to and resident in Canada who is in a position to receive and care for such relative."

Relaxing of Canada's strict immigration restrictions will meet in some measure the pressing demands being made on behalf of refugees or displaced persons having relatives in Canada anxious and able to provide them with homes.

The minister stressed that the action was only intended as a short term measure and provided only for the admission to Canada of approved persons who could be maintained until established and provided with housing by relatives.

OTTAWA. — Action will be taken by the government to have men "of the highest type" brought to Canada to replace the prisoners of war as workers in the sugar beet fields of Manitoba, Ontario and Alberta, according to a statement made in the house by Hon. J. G. Gardiner, minister of agriculture.

The minister did not disclose other than to say: "I hope when the announcement is made as to who these men are, where they are coming from, and how they are getting here; everyone will be ready to say that they are just as good as the prisoners of war, and will make much better permanent settlers in Canada."

CANADIAN JOB

Australian Air Gunner Wants Berth With The R.C.A.F.

SEATTLE. — Flt. Sgt. Reginald P. Howard, Australian air gunner whose recovery from war wounds was one of the medical miracles of the war, has come to Canada to enlist in the R.C.A.F.

Howard flew back to his base near Tohruk in North Africa Sept. 17, 1942, after a flight against Italian ships, holding a portion of his brain in place with one hand and stopping the flow of blood from other wounds with the other.

He survived, after nearly a year of hospitalization, was discharged from the air force in 1943 and went to sea on a troop ship to see more action. He said he would seek an instructor's berth with the R.C.A.F.

ARAB STATE UNION

New Monarch Asks Subjects For Support Of Federation

AMMAN, Trans-Jordan. — In a setting of dazzling regal splendor, bearded, 64-year-old Abdullah Ibn Al Hussein formally accepted kingship over 300,000 subjects and called on the rest of the Arab world to unite with him for a federation of Arab states.

Abdullah ascended the throne of this British-protected kingdom by virtue of a treaty signed in April, ending Britain's league of Nations mandate. The country had been administered jointly by the British high commissioner for Palestine and Trans-Jordan, and Abdullah as Emir, supported by a constitutional government.

DATE ANNOUNCED

Deadline For Demobilization Of R.C.A.F. Set At September 30

OTTAWA. — Air Minister Gibson announced that Sept. 30 had been set as the deadline for R.C.A.F. demobilization.

A release plan, for those serving in Canada, sets forth the diminishing number of release points necessary for discharge in each month until the deadline. Thus, each serviceman is told the month in which he will qualify for release and may make his plans accordingly.

Personnel overseas, unless interim force volunteers or regular force desirous of continued service, are released upon return to Canada.

Present strength of the overseas force is approximately 5,000.

BOMB LOCATED

Has Puzzled Disposal Company In London For Seven Months

LONDON. — An unexploded bomb at Croydon, south London, the location of which has been puzzling London's bomb disposal company of the Royal Engineers for seven months, discovered 12 feet from a shaft which had been sunk early in the search. The size of the bomb is unknown and another shaft will be sunk above the point of location.

Alaska and Russia are separated by only 56 miles of open sea.

An urgent appeal from Percy R. Bengough, president of the Trades and Labor Congress of Canada, to all members of organizations affiliated with that body to actively participate in the forthcoming National Clothing Collection on behalf of the suffering people of Europe has gone out today from national headquarters of the Canadian Allied Relief.

In a message to William Massey Birks, national chairman of the campaign, Mr. Bengough says: "There is no question that the working people of Canada fully realize the urgent need for clothing in the war-devastated countries. I am confident you can count on the utmost support from the affiliated membership of the Trades and Labor Congress of Canada in the second National Clothing Campaign to take place from June 17 to June 29. I would strongly urge all representatives officers from the Atlantic to the Pacific to support and actively participate in their local collections."
